

Strong Plea for Home Educational Institutions Made By Judge Richardson of Roswell

About Time to Realize Dividends
on \$3,000,000 Invested in New Mexico
Educational Plants, Says Speaker

Every Child Educated in Public Schools of State Should
Spend at Least Two Years in One of the State Schools;
Graduation Exercises of University of New Mexico,
Held for First Time on Campus Prove Auspicious and
Successful This Morning With Large Number of People
in Attendance.

"I contend that every child educated in the public schools of New Mexico, or any private school, or small college within her borders should spend at least two years in one of her state schools."

The foregoing is the nub of a strong plea for greater patronage of New Mexico state educational institutions, made this morning at the commencement exercises of the University of New Mexico by Judge Granville A. Richardson of Roswell, commencement speaker. Judge Richardson pointed out the heavy investment made by the state and her people in higher institutions of education and believed that it was about time for the people to begin realizing dividends on this great investment by giving their children the benefit of the training thus furnished at home.

Judge Richardson's address was as follows:

State Educational Institutions.
Members of the Graduating Class of the University of New Mexico, Ladies and Gentlemen:
It would give me greater pleasure and you greater satisfaction, I am sure to speak to you on this commencement day of some of those dreamy things which naturally arise in our hearts and minds on these occasions, and point out to you the path of duty for the future, the importance of character and reputation as you step today with that other youth of the land, from these halls into that great university of life to fill the depleted ranks vacated by others who have gone before you filled with the same old dreams that you possess, but alas, the realization of which comes to no man. But not so, I do not come to you today to acquit myself of a literary duty to you, so much as I come to discharge a duty I owe to my beloved state, the state of New Mexico. I come to talk to you briefly about "home" matters.

Do you know that the state of New Mexico has invested and holds in values, between two and three million dollars in state educational institutions? The universities, the A. and M. college of New Mexico, the New Mexico Military Institute, the Normal schools, and the School of Mines, nearly all of which were established twenty-five years ago. A quarter of a century has elapsed since they were founded, yet in the "class rooms and the halls of these institutions you will find not a single student who was not born in this state. These institutions are equipped with splendid instructors and libraries, and the apparatus of like institutions of other states.

Is it not time for dividends to accumulate? Not in dollars, but in the education of our own young people in the intellectual, moral and physical development, that being the purpose of their establishment. If your fathers invested millions in railroads, mines or lands, you and they would expect large returns within a quarter of a century. These institutions are equipped with splendid instructors and libraries, and the apparatus of like institutions of other states.

I contend that every child educated

in the public schools of New Mexico, or any private school or small college within her borders, should spend at least two years in one of her state schools.

Out of the class of forty-one graduating at the Roswell high school of 1912, thirty-five continued their educational work in the various schools of the country, but only five of whom entered our own state institutions. Not to exceed fifty per cent of our population know today that we have a University of New Mexico, and the same percentage of our population are ignorant of the existence and location of our other state schools. There's every reason why young men and young women would come from other states to our schools, because of our unequal climate, as well as the opportunity offered for general and proper development of men and women.

I am of the opinion that the boards of control of these educational institutions may remove this condition, at least, to a large extent, by publicity. Send the heads of these institutions among the people, closer contact with our citizens and a larger patronage of the press of the state in making known the merits of our schools.

You and your parents may say that the state institutions are small and insignificant, lacking in influence and standing to give young men and young women the position in the educated world, they desire. Not so. Do you know that in 1746, the first class graduated at Harvard and numbered but nine, and that it was about this time that John Harvard died and made that "magnificent" bequest of three hundred pounds and that "great" library of three hundred volumes to Harvard university? There are one thousand, at least, collection of books in your beautiful city of a much greater number of volumes. The state institutions are well supplied with libraries ample and sufficient for general, as well as special research work, and technical investigation and education.

Yale college for more than one hundred years did not have a single building of her own. Great buildings are important, but they do not make a great institution of learning. The late President Garfield, in a public address, said very truthfully, that you place a good teacher at one end of a rough plank, and a good student at the other end of the plank, and you have a good school. If our institutions are rough planks, you have great schools, because I know you have well equipped men and women as instructors. Those who know and can impart that which they may know to others seeking, and I know our children as students, and in all other respects, are the average of the land.

We have in the state institutions of learning in New Mexico, instructors from the great colleges of this country. We have the learning of these great universities right at our door. In our midst, yet we seek them elsewhere, expending thousands of our money in other jurisdictions. Yet that is not the greater loss. We are sending our young men and young women away from our own great state where we need them, their work and their activities, into other states, and sixty per cent of them never return to us.

Speaking of conservation, we had better conserve this young life and blood in our own state and its up-building.

I come therefore, today to solicit

"Home Sweet Home," and yet, when it comes to our boys and girls, we hurry from home, away from our own institutions to educate them. We build for others at the waste and expense of our own state.

I have a boy, who if he lives, will be a member of the class of 1914, Roswell high school, and I can today assure you he will for several years continue his education in one of the state schools of New Mexico.

After students have finished in the schools of the state and desire further to pursue a course of study, special or to finish, I do not object, but I do insist that our people should recognize the merits of our home institutions. Is it not time for some of us to be at home in New Mexico?

Now this duty to the state discharged, and hoping as I do, that it may find lodgment in some heart who will hear me and hear you as you go forth to battle for recognition of your alma mater, I digress to speak a few words to the class.

Your work is finished here. "The day is done." You doubtless will enter some of the great universities of this country, and continue your work of education. When you have finished there, come back to us. We need you. The state has a place in her young life for your young life, and then tell me if your best intellectual, moral and physical development was not acquired in the home schools of New Mexico.

It is my belief here in this state, standing as she does at the very dome of the continent, in these valleys, under this golden sunlight, among these mountains:

"Rock-ribbed and ancient as the sun; the vales stretching in pensive quietness between;

The venerable woods—rivers that move,

In majesty, and the complaining brooks;

That make the meadows green;—Here will be developed the best and brightest minds, and strongest characters in all this broad land of ours.

When you return to the state to assume the duties and obligations of citizens, conscious of your own powers developed, to assist in building a great state, I pray you go back to the task brave and resolute, determined that no shadow shall rest upon her fair name, and that you will finish the work commenced and made possible by your fathers, erect splendid standards of service and success, and send signals to guide those that are to come after you, in such manner that when the end comes, as it will come to all, take not the view of Thackeray that you go like one who wraps the drapery of his couch about him, and lies down to pleasant dreams, but rather sing the other song of life given us elsewhere:

"Life, we've been long together through pleasant and through cloudy weather;

'Tis hard to part when friends are dear;

Perhaps 'twill cost a sigh, a tear, Then steal away, give little warning,

Choose thine own time. Say not good-night, but in some brighter clime

(If you find one) Bid me good morning."

Uncle Sam's Bug Sharp Doesn't Fear Hoppers

Ditches Can Be Dug to Entrap Pest in Eastern New Mexico Says Government Entomologist.

[Special Correspondence to the Herald]

Roswell, N. M., May 28.—That the army of grasshoppers moving through eastern New Mexico is only a temporary affliction and that the rich Pecos valley need have no fear of being devastated, is the belief of Dr. A. C. Hammar, the government entomologist located here who has been detailed to look into the hopper invasion which recently developed near Elida.

Dr. Hammar made a careful investigation of the infested district Sunday, and wired the government the report.

He says that he finds that they are migratory grasshoppers, originating from a swarm that settled on the plains below Elida last fall and laid their eggs. These eggs have now been hatching.

The first hoppers hatched about three weeks ago and are now about an inch long.

The infested area covers over a hundred miles square and all of the young hoppers, not being able to fly, are marching northerly.

Mr. Hammar says it will probably take several weeks or months, possibly more, before the hoppers develop wings when they will likely all fly off towards the east and considerable distance from where they originated. The infested area is naturally badly damaged, said Mr. Hammar, for grazing purposes, and it is to be advised that the stock be moved.

In regard to remedies, said Prof. Hammar, "it may be possible to place ditches diagonally across the part of the land the grasshoppers are on and to dig pitfalls at the intersecting points thereby many hoppers can be destroyed."

Very likely some action will soon be taken. The Santa Fe Railway company had two men detailed in the area Monday, who intend to put out poison bait and it is also hoped that some cooperation may be secured from the federal department of agriculture.

BIDS ASKED FOR SLUICE AND PENSTOCK GATES ON ENGLE PROJECT

Washington, D. C., May 25.—The reclamation service is asking for proposals for furnishing sluice and penstock gates and accessories for the Elephant Butte dam, Rio Grande project, New Mexico-Texas. The bids will be opened at the office of the reclamation service at Elephant Butte, New Mexico, on June 25, 1913.

RATON BOY WINS MORTON MEDAL AT N. M. M. I.

Cadet Voorhees Successful Orator; Military Institute Has Largest Enrollment on Record.

[Special Correspondence to the Herald]
Roswell, N. M., May 27.—Cadet E. J. Voorhees of Raton, a senior classman, won the Morton oratorical contest last night. His subject was "Martin Luther." The other orators were D. O. Murphy, "Lee," O. S. Parrish, "National Self-Preservation," W. H. McKee, "The Price of Progress," G. V. Clayton, "The Value of Ignorance." The judges were G. A. Richardson, J. M. Harvey and Rev. H. Van Valkenburgh.

Judge Edward A. Mann of Albuquerque is the commencement speaker at the graduation exercises held this evening. Cadet Voorhees delivered the valedictory address.

The New Mexico Military Institute this year closes with flying colors—higher than ever before. It closes with an enrollment of 150 cadets—the largest in its history. The year has been the best in all departments—academically, militarily and athletically. Two champion teams were turned out—football and baseball.

Colonel Willson says he sees no reason why the institution will not be continued as "distinguished," being one of the ten classes as such out of the whole United States.

There are more out-of-town visitors at the commencement exercises this year than ever before. Those off from a distance are: Capt. J. E. Reinburg, U. S. M. C., retired, of El Paso; Mrs. A. M. Bergere and daughter of Santa Fe; Charles Closson and daughter of Santa Fe; L. D. Moore and daughter of Raton; Mrs. H. C. Jones of Raton; Mrs. C. D. Stevens of Raton; and M. C. Stewart and family of Carlsbad, and Henry Lutz and family of Lincoln. All of these have sons in the graduating class.

Following is the graduating class: Antonio Jose Luna Bergere, Santa Fe; John Lee Brault, Albuquerque; Emory Taylor Carothers, Georgetown, Tex.; Genevieve Verner Clayton, Carlsbad; Thomas Cleveland Closson, Santa Fe; Edgar Leake Cooper, Georgetown, Tex.; Marshall Crutcher, Roswell; Richard David Dandridge, Dayton; Samuel Sherman Dickson, Gallup; Henry Herman Elder, St. Louis, Mo.; Thomas Oliver Edwards, Jr., San Francisco, Cal.; James S. Harrison, Canadian, Tex.; William Quayle Howell, Trinidad, Colo.; William Hugh Jennings, Gallup; C. W. Johnson, Jr., Graham, Tex.; Ollie L. Jones, Raton; Arthur Carruthers, Kinsey, Colorado Springs, Colo.; John Bennett Lassater, Globe, Ariz.; Antonio Jose Luna, Santa Fe.

\$10,000 BLAZE IN DEMING RESULT OF GASOLINE

Steam Laundry Burned to the Ground With Loss of \$10,000; Man Seriously Hurt By Flames.

[Special Correspondence to the Herald]
Deming, N. M., May 27.—The Deming steam laundry, owned by John Steineman, caught fire as the result of an explosion of gasoline this afternoon at 3:20 and burned to the ground. The building and machinery was worth about \$10,000. Steineman had but \$2,550 insurance. When the gasoline exploded, Nestor Chavez was seriously burned about the face and shoulders. The whole building was gutted within twenty minutes after the fire started.

Miss Gertrude Hanes, who has been teaching the past year in the Deming high school, left today for Zanesville, Ohio, her home. Miss Freda Scott, another of the Deming teachers, will leave Sunday for Logansport, Ind., where she will spend the summer. Miss Julia Iverson has given up her work in the Deming schools and has accepted a position in Salem, Ore. Miss Martha Edie is taking the summer course at the Silver City normal, as is also Pansy Young and Margaret Goebel. Miss Stahlman, the domestic science teacher, is spending the summer in Hutchinson, Kan. Julia Porter leaves Sunday for her home in Virginia, where she will spend the summer. Lillian Layton leaves in a few days for California to spend her vacation.

John W. Stusser purchased today 150 acres of land from the Alfalfa Farms company, and will move here with his eight sons in the near future. He is from Putnam county, Ohio. Thad M. Graves of Boone county, Illinois, but who has been recently farming land in Minnesota, also purchased land from the same company to the amount of eighty acres. Henry D. Rebeck, a farmer of Ogile county, Illinois, bought forty acres of the company's land, as did also George G. Myers, also of Ogile county. Grant Armstrong, of Pontiac, Ill., who accompanied C. E. Miesse here in April and purchased land, returned with Mr. Miesse on this trip and selected forty acres of land for his nephew, Orland L. Ellis, and forty acres for his brother, A. W. Armstrong, both of Livingston county, Illinois. Mr. Armstrong also selected forty acres for Joseph G. Stagg, of Livingston county, Illinois. The construction work on the tract is progressing very rapidly.

For Stomach and Liver Sufferers
Don't take medicine for your Stomach ailments morning, noon and night, as usually such medicines only give temporary relief and simply digest the food that happens to be in the stomach.

Don't permit a surgical operation. There is always serious danger in operations and in almost every case of Stomach, Liver, Intestinal Ailments, Appendicitis and Gall Stones, the knife can be avoided if the right remedy is taken in time.

Don't go around with a foul smelling breath caused by a disordered Stomach and Liver to the discomfort of those you come in contact with.

Don't think you cannot be cured of your Stomach trouble, worse cases than yours have been cured by Mayr's Wonderful Stomach Remedy. Most stomach ailments are mainly caused by a catarrhal condition. Mayr's Wonderful Stomach Remedy not only removes the catarrhal mucus, but also the chronic inflammation, and assists in rendering the entire alimentary and intestinal tract antiseptic, and this is the secret of its marvelous success.

Don't suffer constant pain and agony and allow your stomach ailments to physically undermine your health. No matter how severe your case may be or how long you have suffered—one dose of Mayr's Wonderful Stomach Remedy should convince you of a cure. This remedy has been taken and is highly recommended by Members of Congress, Justice of the Supreme Court, Educators, Lawyers, Merchants, Bankers, Doctors, Drug-Sists, Nurses, Manufacturers, Priests, Ministers, Farmers and people in all walks of life.

Send for FREE valuable booklet on Stomach Ailment to Geo. H. Mayr, 154-156 Whiting St., Chicago, Ill.

Tingles Blood with Warmth and Life

Anaemic, Pale, Thin, Bloodless, Tired, Weary People Feel the Breath of New Life and Vigor.

Don't Let the Wicked Imps of Bad Blood Lay You Low; S. S. S. will Save You.

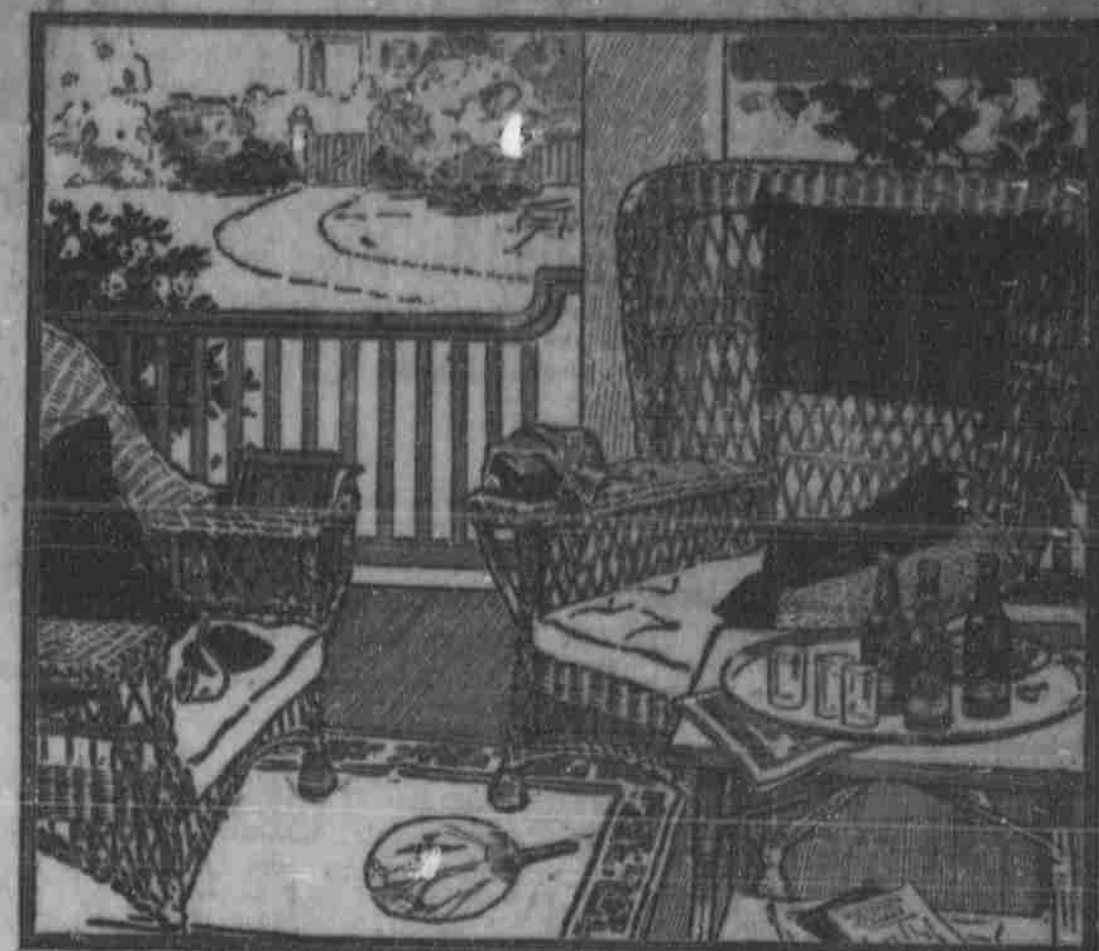

The blood often needs a bad blood-killer. It demands help. It has lost that pulsating, invigorating effect that gives brightness to the eye, springiness to the steps, activity to the stomach and digestion, and that ought to make you feel keen, alive and thrilled with the sensation of nervous and muscular energy. And you can realize all of these joyful experiences by a short use of that wonderful blood-purifying medicine so familiar to a host of people as S. S. S.

It drives out the pains and aches of rheumatism, puts life into your dull, listless nerves, awakens the sluggish brain; animates the tired, weary muscles; and arouses your blood to throw out of the system all those poisonous germs and acids that cause eczema, lupus, psoriasis, acne, pimples, boils, tetter and those scrofulous taints which keep people half sick and make their

skin unsightly.

Nearly all sickness is due to sluggish blood. And if you let S. S. S. bathe your system with its wonderful influence your nervous troubles, your wan, weary, faded, listless, lifeless body will revive and become so renewed with the sense of enjoyable health you will scarcely know yourself. Try S. S. S. today. Get a bottle at any drug store. It will drive out the "dope," puff you on your feet; keep you going all day and enable you to sleep sound and restful. S. S. S. is not a "dope," not a phyebe, but a fine, bracing, purifying medicine that is sure to do you a world of good.

It is just what you need. S. S. S. is prepared in the great laboratory of Atlanta, Ga. and if you are troubled with any stubborn blood disease their medical dept. will guide you safely to health. Write them.

Where's more real enjoyment?
The shady home-porch, a comfortable chair,
a good cigar or pipe, a congenial friend, and
a cool, refreshing bottle of

Budweiser

Every Week, 3,000,000 Bottles

That is the output of Budweiser.

The Anheuser-Busch main plant and branches give employment to 7,500 people. The main plant covers 142 acres, equal to 70 city blocks. There are 110 separate buildings—a city in themselves.

Hundreds of visitors every day go through with guides to inspect this immaculate institution.

One cannot see it without the conviction that quality is an Anheuser-Busch rule.

DRASTIC CHANGE IN BONUS SYSTEM ALONG SANTA FE ANNOUNCED

San Bernardino, Cal., May 28.—A drastic change in the system of bonus keeping all along the Santa Fe system will be made July 1, which is the beginning of the new fiscal year of the company.

Since the resignation of J. E. Spier as head of the bonus system, installed by Emerson several years ago, and followed by former Vice President J. J. W. Kendrick, who stepped down from his official seat in 1909, it has been known that B. T. Payne, the now chief bonus supervisor, would make some changes in the office methods of time
